RECOMMENDED LEARNING PLAN

Month 1 – Foundations

- Python OOP, file I/O, REST APIs (FastAPI/Flask)
- Git + GitHub: commits, branches, PRs
- HTML/CSS deep-dive + responsive design

Month 2 – Build

- React fundamentals + hooks
- SQL basics (SQLite / PostgreSQL)
- LeetCode Easy problems (10 DSA)

Month 3 – Polish + Apply

- Full-stack mini-project to completion
- Resume, LinkedIn, cold outreach
- Mock interviews + 20 applications

SUGGESTED PROJECTS

1. Personal Portfolio Website

React + deployed on Vercel. Showcases projects and skills.

2. Task Manager App

Python (Flask) backend + HTML/JS frontend + SQLite DB.

3. GitHub API Dashboard

Fetch & visualise GitHub stats using Python + REST APIs.

4. CLI Automation Tool

Python script solving a real problem (file sorter, scraper).

■ Each project must be on GitHub with a README.

NETWORKING STRATEGY

- **LinkedIn:** Optimise profile, post 2x/week about projects
- **GitHub:** Daily green squares — commit every day
- **Communities:** Join Dev.to, Hashnode, local tech meetups
- **Cold DMs:** 5 engineers/week — ask for 15-min chats
- **Platforms:** Internshala, LinkedIn Jobs, AngelList, Wellfound
- **Referrals:** Ask professors / seniors for referrals
